Dear Colleagues,

we would like to announce the forthcoming

## Carl-Glaser-Symposium 2019

which will be held May 26-28, 2019 at the Physikzentrum Bad Honnef  
(<http://www.dpg-physik.de/dpg/pbh/index.html>)

One of the most prominent key reactions in the synthesis of carbon-rich materials is the **Glaser coupling**, the oxidative dimerization of acetylenes. This reaction was published by Carl Glaser in 1869. At that time he was assistant of famous August Kekulé in Bonn.

Since his work is a contribution of the Chemical Institutes of the University of Bonn, the 150th anniversary of this publication will be celebrated with a Mini Symposium held in Bad Honnef, close to Bonn.

The symposium will be held from May 26th (Sunday afternoon) until May 28th (Tuesday after lunch) and bring together some of the leading organic chemists from all over the world. Oral contributions will be given by:

**Takuzo Aida**  
**Harry L. Anderson**  
**Peter Bäuerle**  
**François Diederich**  
**Michael M. Haley**

**Stefan-S. Jester**  
**John M. Lupton**  
**Mogens B. Nielsen**  
**Carsten Reinhardt**  
**Rik R. Tykwinski**

The number of participants is limited to 100. The total fee includes registration, accommodation, full board and social program and is 310 € (single room); reduced price for the students is 250 € (double room). Participants will be accommodated at the conference site.

All participants are invited to present their work with a poster.

For further information and registration see: <http://www.chemie.uni-bonn.de/oc/carl-glaser-2019/>

Deadline for registration is April 5<sup>th</sup>, 2019.

Registration is only valid after transfer of fees (first come, first serve).

We are looking forward to welcoming you and your co-workers in Bad Honnef.

With best wishes,  
the Organization Team
